URITECT INC.

From a photo to a finished space.

AI that lets anyone see a renovation before it begins, then shop it and hire the people to build it.

RCHIBI

THE PROBLEM

Every renovation starts with a guess

01

Hard to picture

Most people cannot see a finished room in an empty one, so big decisions are made on faith.

02

Scattered steps

Inspiration, furniture and contractors live in different places, with nothing connecting them.

03

Costly to get wrong

Design fees, wrong purchases and rework all arrive before anyone sees the result.

OUR ANSWER

Archibi: one app from idea to renovation

1

Design

Snap a room, a façade or a garden, choose a style, and see it redesigned in seconds.

2

Shop

Archibi recognises the furniture in a photo and finds similar pieces to buy, with prices and stores.

3

Hire

Share the design with vetted architects, designers and contractors, and contact them in one tap.
