URITECT INC. · INVESTOR Q&A

Uritect Investor Q&A

Likely questions from U.S. funders and investors, with short, official answers.

U.S. Funder & Investor Pitch Session · October 21, 2026
For the Uritect team · Confidential

October 2026

BEFORE YOU PRESENT

30 questions, ready to answer.

This sheet prepares the Uritect team for the question-and-answer part of the U.S. funder session. It follows the investor deck, and every fact in it comes from the deck or from our published product pages.

Each answer is written to be said aloud in about thirty seconds. Lead with the first sentence; the rest is there if the investor wants more.

Wherever an answer needs a number we have not yet confirmed, it shows a numbered red slot. Fill every slot below before the session. If a number is not ready on the day, say so plainly and offer to follow up by email. Never estimate a figure on the spot.

Numbers to add before October 21 (28 slots)

SLOT	WHAT TO ADD	VALUE	USED IN
ADD 1	Average AI cost per render		Q10
ADD 2	Planned Find Pro or partner revenue model, if decided		Q12
ADD 3	Customer acquisition cost (CAC)		Q14
ADD 4	Free-to-paid conversion rate		Q14
ADD 5	Average monthly revenue per paying user		Q14
ADD 6	Monthly subscriber churn		Q14
ADD 7	Gross margin		Q14
ADD 8	Customer lifetime value (LTV)		Q14
ADD 9	Total Archibi downloads		Q15
ADD 10	Monthly active users		Q15
ADD 11	Paying subscribers		Q15
ADD 12	Month-over-month growth rate		Q15
ADD 13	Revenue to date or current monthly recurring revenue		Q15
ADD 14	Approved Find Pro professionals		Q16
ADD 15	Find Pro applications received		Q16
ADD 16	Funding raised to date, including grants and investors		Q17
ADD 17	Key hires planned with this round		Q19
ADD 18	Current U.S. users or early U.S. traction		Q20
ADD 19	Planned U.S. marketing budget		Q21

SLOT	WHAT TO ADD	VALUE	USED IN
ADD 20	Corporate structure and investment route for U.S. investors		Q22
ADD 21	Raise amount		Q23
ADD 22	Instrument and key terms		Q23
ADD 23	Amount already committed, if any		Q23
ADD 24	Use-of-funds breakdown		Q24
ADD 25	Runway in months		Q24
ADD 26	Milestones this round reaches		Q24
ADD 27	Brightment installations completed and average job value		Q25
ADD 28	Policy on storing user photos and using them for AI training		Q29

Key facts to have at hand

Company	Uritect Inc., University of Toronto, Schwartz Reisman Innovation Campus, Toronto
Flagship	Archibi AI, live on the App Store and Google Play
Archibi today	5 design tools · 75+ design styles · Furniture Finder across 100+ stores · 100+ curated ideas
Plans	Free (5 welcome renders) · Plus $6.99/mo or $59.99/yr (90 renders a month) · Pro $29.99/mo or $249.99/yr (450 renders a month) · Enterprise by arrangement · top-up packs
Find Pro	Professionals portal live at pro.archibi.ca; every profile reviewed before it goes live; free for professionals
Brightment	AI egress-window concepts, then design, permits and installation across Canada; most single-window installs in one day once permitted; $0 down through a financing partner, subject to approval
Market	About $519B projected annual U.S. homeowner spending on improvements and repairs (Harvard JCHS, Leading Indicator of Remodeling Activity, July 2026)
Milestones	2024 Richmond Hill office, CIX and DiscoveryX · 2025 joined U of T's innovation hub · 2026 Archibi, Find Pro, Brightment and Blink20 launched

The questions at a glance

THE COMPANY

Q1 What does Uritect do, in one sentence?
Q2 You have eight products. Isn't that a lack of focus?

MARKET AND CUSTOMERS

Q3 How big is the opportunity?
Q4 Who is your customer?

THE PRODUCT

Q5 What is live today?
Q6 How realistic are the designs? Can people rely on them?

COMPETITION AND DEFENSIBILITY

Q7 Who are your competitors?
Q8 What stops a large tech company or a home retailer from copying you?

AI AND COSTS

Q9 Do you build your own AI models?
Q10 What does each design cost you, and how do you keep AI costs under control?
Q11 What happens to your business if AI gets cheaper, or more expensive?

BUSINESS MODEL AND UNIT ECONOMICS

Q12 How do you make money?
Q13 Why these prices, and who pays for Pro?
Q14 What are your unit economics?

TRACTION

Q15 What traction do you have?
Q16 How many professionals have joined Find Pro?
Q17 Have you raised money before?

THE TEAM

Q18 Why is this the team to win?
Q19 Who will you hire with this funding?

U.S. EXPANSION

Q20 Why the U.S., and why now?
Q21 How will you reach U.S. users?
Q22 How can U.S. investors invest in a Canadian company?

THE RAISE AND USE OF FUNDS

Q23 How much are you raising, and on what terms?
Q24 How will you use the money?

BRIGHTMENT

Q25 What is Brightment, and why should an investor care?
Q26 Isn't a construction service a distraction for a software company?

RISKS

Q27 What are the biggest risks, and how do you manage them?
Q28 Who is responsible if a design can't be built, or a professional does poor work?
Q29 How do you handle the photos people upload of their homes?

THE VISION

Q30 Where will Uritect be in five years?

THE COMPANY

Q1 What does Uritect do, in one sentence?

Uritect builds AI products for the built world. Our flagship, **Archibi**, lets anyone photograph a room, a house front or a garden and see it redesigned in seconds, then shop the furniture in that design and contact a vetted professional to build it.

We are a Canadian company based at the University of Toronto's Schwartz Reisman Innovation Campus.

Q2 You have eight products. Isn't that a lack of focus?

Our focus is Archibi, and this raise is for Archibi. The other products each play a supporting role. Arch School, ArchNews and CanadaTechNews build audience and trust. Brightment proves that an AI concept can turn into a paid installation. Blink20 began as a tool for our own team and is free.

They share one team, one technology base and one mission, so they feed the flagship rather than compete with it.

MARKET AND CUSTOMERS

Q3 How big is the opportunity?

Harvard's Joint Center for Housing Studies projects annual U.S. homeowner spending on improvements and repairs at about **$519 billion** (Leading Indicator of Remodeling Activity, July 2026).

Archibi sits at the very start of that spending: the moment someone decides what to do. Whoever helps people make that decision is well placed to guide what comes next, from the furniture they buy to the professional they hire.

Q4 Who is your customer?

First, homeowners and renters planning a change, for whom Plus is an easy monthly decision. Second, professionals who use designs in their work, such as real estate agents preparing listings, interior designers, architects and contractors, who choose Pro for high-resolution images and commercial rights. Teams and businesses buy Enterprise, and design and architecture students round out our users.

THE PRODUCT

Q5 What is live today?

Archibi is live on the App Store and Google Play. It has five design tools (Interior, Exterior, Landscape, Sketch to Render and Find Furniture), more than 75 design styles, a Furniture Finder that draws on more than 100 stores, and an Idea Bank of more than 100 curated ideas.

Find Pro, our portal for professionals, is live at pro.archibi.ca, and every professional profile is reviewed by our team before it goes live.

Q6 How realistic are the designs? Can people rely on them?

The images are realistic and keep a room's true proportions and light, which is what people need to make a decision and explain it to a partner or a contractor.

We are clear that they are concept visualisations, not construction drawings. That is exactly why Archibi hands the next step to a qualified professional through Find Pro.

COMPETITION AND DEFENSIBILITY

Q7 Who are your competitors?

Three groups: AI room-redesign apps, inspiration and design platforms, and contractor marketplaces. Each does one part of the journey well.

Archibi connects all three, design, shop and hire, in one app, so the customer never has to leave to take the next step. That joined-up journey is what we compete on.

> **NOTE FOR THE PRESENTER** Be ready to name two or three specific competitors and say in one line how Archibi differs from each.

Q8 What stops a large tech company or a home retailer from copying you?

Image-generation models are becoming available to everyone, so a picture on its own is not a lasting advantage, and we do not rely on it. Our advantage is everything around the picture: styles and controls shaped by people who understand buildings, a network of reviewed professionals that takes time to build, a Furniture Finder across more than 100 stores, and a product that already carries a customer from idea to hire.

A retailer will promote its own catalogue and a marketplace its own contractors. Archibi is on the homeowner's side, which also makes large companies natural partners for us, not only rivals.

AI AND COSTS

Q9 Do you build your own AI models?

No, and that is deliberate. We use leading image-generation models from specialist providers and put our effort into what makes the result useful: the styles, instructions and controls behind every design, and the steps that come after the picture.

Our system is built so we can move to a better or lower-cost model as the field improves, without changing the app our customers use.

Q10 What does each design cost you, and how do you keep AI costs under control?

Our average AI cost is **ADD 1** average AI cost per render per design.

Costs stay predictable because every plan has a fixed allowance: 5 welcome renders on Free, 90 a month on Plus and 450 a month on Pro, with extra renders sold as top-up packs. A paying customer never uses more AI than they have paid for, and free users get a limited trial.

Q11 What happens to your business if AI gets cheaper, or more expensive?

As models get cheaper, our margin improves and we can offer more renders or higher quality at the same price. If a provider raised its prices, we can switch providers, adjust allowances or reprice top-ups.

Because our value is the whole journey rather than one model, we are not tied to any single supplier.

BUSINESS MODEL AND UNIT ECONOMICS

Q12 How do you make money?

Today, from subscriptions and render top-ups. Our plans are Free, Plus at $6.99 a month or $59.99 a year, Pro at $29.99 a month or $249.99 a year, and Enterprise by arrangement, sold through the App Store, Google Play and card.

Find Pro is free for professionals while we build supply. Once clients and professionals are meeting regularly, the marketplace and partnerships with retailers and building brands are our next revenue opportunities. **ADD 2** planned Find Pro or partner revenue model, if decided

Q13 Why these prices, and who pays for Pro?

Plus is priced to be an easy decision for a household planning a project. Pro is built for people who use designs in their work and adds 4K downloads, commercial usage rights, full Sketch to Render and priority processing.

Annual plans cost roughly 30% less than paying monthly, which rewards loyal customers and gives us more predictable revenue.

Q14 What are your unit economics?

- Customer acquisition cost: **ADD 3 customer acquisition cost (CAC)**
- Free-to-paid conversion: **ADD 4 free-to-paid conversion rate**
- Average revenue per paying user: **ADD 5 average monthly revenue per paying user**
- Monthly churn: **ADD 6 monthly subscriber churn**
- Gross margin after AI and app store fees: **ADD 7 gross margin**
- Customer lifetime value: **ADD 8 customer lifetime value (LTV)**

Because AI use is capped by each plan, our main variable cost rises only with paid usage.

> **NOTE FOR THE PRESENTER** If a figure is still early, say so and share the direction it is moving rather than a projection.

TRACTION

Q15 What traction do you have?

In 2026 we launched Archibi on the App Store and Google Play, opened Find Pro to professionals, launched Brightment on iOS and Android, and released Blink20 on five platforms in 21 languages.

Archibi has **ADD 9 total Archibi downloads** downloads, **ADD 10 monthly active users** monthly active users and **ADD 11 paying subscribers** paying subscribers, growing **ADD 12 month-over-month growth rate** a month. Revenue: **ADD 13 revenue to date or current monthly recurring revenue**.

Q16 How many professionals have joined Find Pro?

ADD 14 approved Find Pro professionals professionals are live, from **ADD 15 Find Pro applications received** applications. Every application is reviewed by our team and goes live only when the profile is complete, so quality comes before quantity.

Introductions to U.S. architects, designers and contractors are part of what we are asking for.

Q17 Have you raised money before?

ADD 16 funding raised to date, including grants and investors

Uritect is supported by Pycap Inc. and the University of Toronto entrepreneurship community. We took part in CIX 2024 and DiscoveryX 2024, and joined U of T's innovation hub at the Schwartz Reisman Innovation Campus in 2025.

THE TEAM

Q18 Why is this the team to win?

We bring architecture and AI together under one roof, so we design for how renovations really happen. Hamidreza Zandi (CEO & Founder) and Masoumeh Shoar (COO & Co-Founder) lead the company, Dr. Shahla Zandi leads product, design and marketing, and Abtin Zandi leads development and AI, with back-end, Android, front-end and AI developers alongside them. Women hold founding and key roles.

In 2026 alone, this team shipped four products across mobile, web and desktop.

> **NOTE FOR THE PRESENTER** Be ready with one sentence on each founder's background in architecture, design or technology.

Q19 Who will you hire with this funding?

ADD 17 key hires planned with this round

In line with our ask, our priorities are people who grow U.S. users and partnerships, and engineers who scale the AI and the apps.

U.S. EXPANSION

Q20 Why the U.S., and why now?

U.S. homeowners spend about $519 billion a year on improvements and repairs, and U.S. homeowners, real estate agents and designers are exactly the people Archibi is built for. The product is live and complete, and it is sold through the App Store and Google Play, so growing in the U.S. is a matter of marketing and partnerships, not rebuilding.

ADD 18 current U.S. users or early U.S. traction

Q21 How will you reach U.S. users?

- **Social video.** A before-and-after redesign is made to be shared, and Archibi is already on Instagram and TikTok.
- **Partners.** Furniture retailers, real estate and building brands that plug into Design, Shop and Hire.
- **Professionals.** Find Pro members have every reason to show Archibi to their own clients.
- **Content and education.** Design stories and free workshops that build trust before the first download.

Budget for this plan: **ADD 19** planned U.S. marketing budget.

Q22 How can U.S. investors invest in a Canadian company?

ADD 20 corporate structure and investment route for U.S. investors

We are glad to walk through the structure with your counsel.

THE RAISE AND USE OF FUNDS

Q23 How much are you raising, and on what terms?

We are raising **ADD 21** raise amount through **ADD 22** instrument and key terms. Commitments so far: **ADD 23** amount already committed, if any.

Q24 How will you use the money?

Three things, matching our ask: growing Archibi's U.S. user base; scaling the AI that powers it; and building partnerships with retailers, real estate and building brands, along with a strong bench of U.S. professionals on Find Pro.

Split: **ADD 24** use-of-funds breakdown. This round gives us **ADD 25** runway in months of runway and takes us to **ADD 26** milestones this round reaches.

BRIGHTMENT

Q25 What is Brightment, and why should an investor care?

Brightment is our proof that a free AI concept app can lead straight to a high-value service job. A homeowner photographs a basement window and sees a realistic egress window, window well and landscaping. Then one Brightment team handles design, permits, excavation and installation, and most single-window installations are finished in one day once the permit is in hand. Homeowners can start with $0 down through our financing partner, subject to approval.

ADD 27 Brightment installations completed and average job value

Q26 Isn't a construction service a distraction for a software company?

Brightment is narrow on purpose: one product, the egress window, which turns a dark basement into a space that can legally become a bedroom or a rental suite. It runs on the same AI and app platform as Archibi, and it shows us, with real customers, how a design becomes a signed job.

Brightment's service operates in Canada today. Our U.S. plan leads with Archibi; Brightment's model is one we could bring to U.S. partners later.

RISKS

Q27 What are the biggest risks, and how do you manage them?

- **Competition.** Many apps make images. We compete on the full journey from idea to hire.
- **AI costs.** Every plan has a capped allowance, and we can switch to better or cheaper models.
- **App store dependence.** We also sell by card, and Enterprise is arranged directly.
- **Building both sides of a marketplace.** Archibi's users create demand first, and Find Pro is free for professionals while supply grows.
- **A small team.** This round funds the hires that let us grow in the U.S.

Q28 Who is responsible if a design can't be built, or a professional does poor work?

Archibi's images are presented as concept visualisations, not construction drawings. Archibi makes the introduction; agreements, quotes and on-site work are arranged directly between the client and the professional they choose.

We lower the risk by reviewing every professional before their profile goes live. Every Brightment project is confirmed by an in-person site assessment before work begins.

Q29 How do you handle the photos people upload of their homes?

Archibi has clear privacy controls, and users can delete their account at any time; a deleted account is held for 30 days in case they change their mind.

ADD 28 policy on storing user photos and using them for AI training

THE VISION

Q30 Where will Uritect be in five years?

We want Archibi to be where renovations in North America begin: the app people open first to picture a change, then use to buy it and hire the people to build it.

Every design that turns into a purchase or a project makes the platform more valuable to homeowners, professionals and partners. That is the company we are building.

Prepared by Uritect Inc. for internal use at the U.S. Funder & Investor Pitch Session, October 21, 2026. Product facts are as published on uritect.com, archibi.ca and brightment.ca in October 2026. Market figure: Harvard Joint Center for Housing Studies, Leading Indicator of Remodeling Activity, July 2026 release.
